

AIR ASSIST SWEEP

PADDLE SWEEP

Moisture, pressure, dust, fine particles, improper aeration and pubescence of grain leads it to do the following...

Hard Peaks

Grain Stacks

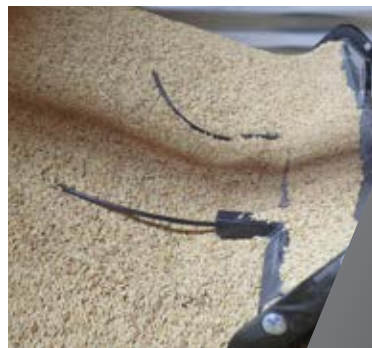

Caked Clumps

Air Assist Paddle Sweep Solution

Sweep uses air pressure shock wave assistance to break through crusted and difficult to move granular materials.

Benefits:

- Reduces the amount of labor needed.
- Reduces personnel from entering the bin.
- Reduces the amount of time it takes to break up crusted materials in the bin.
- Agitators that engage grain stacks, hard peaks and caked clumps of material.
