LIVESTOCK

Features

Polyethylene Hood/Tub (one piece) with Metal Wind Vane

- Beveled hood opening is 28" x 24" - big cattle, even horned cattle, feed easily.
- Low center of gravity for more stability.
- Top of tub is 23" from the ground so calves can gain easy access.
- Aerodynamic hood and wind vane aids directional control.
- Full 360° rotation protects expensive supplements from the elements.
- The 48" x 48" tubular base frame is constructed of 2" 16 gauge, 50,000 psi steel tubing for strength and stability.
